

AddEvent Accessibility Conformance Report

International Edition

(Based on VPAT® Version 2.5Rev)

Name of Product/Version: AddEvent Hosted Pages (current production version, August 2026)

Report Date: August 2026

Product Description: AddEvent Hosted Pages are the customer-facing web pages served by AddEvent.com that organizers embed in or link from their own sites: event landing pages (with and without RSVP), calendar landing pages, and embeddable calendar/event-list widgets. This report covers five representative endpoints: an Event landing page (no RSVP), an Event landing page (RSVP), a Calendar landing page, an Embeddable calendar, and an Embeddable events list.

Contact Information: Michael Nilsson, michael.nilsson@addevent.com

Notes: All five endpoints were tested using Deque AXE DevTools (Pro) 4.12.1 in three modes: Automatic Scanning, Automatic Scanning with AI, and User Flow Analysis (manual testing of interaction logic and keyboard/flow behavior performed directly by AddEvent engineering). All three testing modes returned zero errors on all five endpoints. The User Flow Analysis manual testing was conducted against the WCAG 2.2 AA success criteria. This report covers WCAG 2.0, 2.1, and 2.2 Levels A and AA; Level AAA was not evaluated. AddEvent Hosted Pages are web content only — there is no accompanying hardware, closed/native software, two-way voice or video communication feature, non-web electronic document, or relay/emergency service component, so those sections of this report are marked Not Applicable.

Evaluation Methods Used: Deque AXE DevTools (Pro) 4.12.1 — Automatic Scanning, Automatic Scanning with AI, and manual User Flow Analysis (WCAG 2.2 AA).
